☎ +32 465 400 490

📍 Namur, Belgium

Profile

Final-year Computer Science student at Université de Namur, passionate about building full stack web applications and solving complex algorithmic problems. Experienced in Python, JavaScript, Java and SQL through academic projects, from a physiotherapy telerehabilitation platform to a compiler and a full database-driven art marketplace. Eager to contribute and grow within a dynamic development team.

Courses

BSc in Computer Science (Bac 3)

Université de Namur, Belgium Sep 2023 – Present

Key courses: Algorithms & Data Structures · Databases I & II · OOP · Web Technologies · Networks · OS · AI & Logic · Functional Programming · Compiler Design · HCI · Information Systems Modeling

Academic Projects

MotionRecovery Improved — Physiotherapy Telerehabilitation

Université de Namur · Final Year Project (in progress)

2025 – 2026

- Full stack web app for remote physiotherapy: patients perform exercises, physiotherapists monitor progress
- React (Vite) frontend · Django REST backend · JWT authentication · SQLite database
- Role-based access system: Patient / Physiotherapist / Admin
- Optional Kinect v2 motion capture integration via Kinectron

EMJ Compiler — Emoji DSL to MicroPython

Syntaxe et Sémantique des Langages · Grade: 14.5 / 20

2024 – 2025

- Built a full compiler pipeline: lexer/parser (ANTLR grammar), AST, semantic analysis with symbol table
- Generates MicroPython code to run on Cutebot robots via Micro:bit microcontrollers
- Implemented in Java with ANTLR · Passed full black-box test suite (Jenkins CI)

Artmazon — Art Marketplace Platform

Bases de Données II · Grade: 15 / 20

2024 – 2025

- Designed full relational database schema for an art marketplace (ERD, normalization)
- Features: user roles (client/artist/admin), shopping cart, commission system, payment, delivery, accounting
- PostgreSQL · SQL queries · Stored procedures · Annual reporting
